Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

Empathy Map – OptiCrop: Smart Agricultural Production Optimization Engine

SAYS

- “I want to know which crop will give me the best yield and profit.”
- “Weather is unpredictable; I need reliable recommendations.”
- “I don’t have time to analyze all the data manually.”
- “I need a simple tool that gives accurate advice.”
- “I want to reduce losses and use resources wisely.”

THINKS

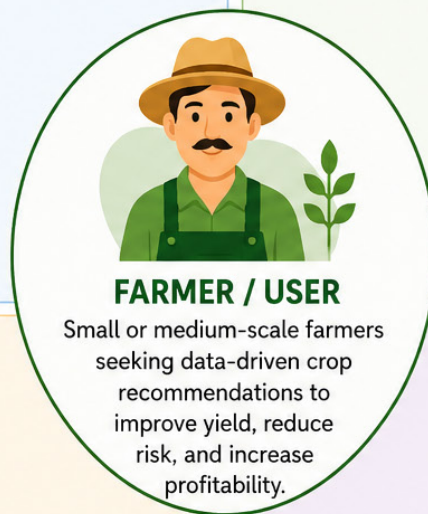

- What is the best crop to grow in my field this season?
- How will soil, weather, and water availability affect my yield?
- Can I trust this recommendation?
- Will this help me increase profit and reduce risk?
- How can I make smarter and sustainable farming decisions?

DOES

- Enters soil, weather, and field details into OptiCrop.
- Checks recommended crops and best planting options.
- Compares results and analyzes insights using charts and data.
- Applies recommendations in the field.
- Monitors results and adjusts decisions based on feedback.

FEELS

- Hopeful about improving crop yield and income.
- Relieved to have data-driven recommendations.
- Confident when decisions are backed by accurate insights.
- Happy to save time and reduce manual effort.
- Empowered to make better farming decisions.
- Satisfied when productivity and profit increase.

Goal

Empower farmers with accurate insights and smart recommendations to optimize agricultural production and resources.

Pain Points

- Lack of reliable and real-time information
- Time-consuming manual analysis
- Uncertainty in crop selection
- Risk of low yield and financial loss

Expectations

- Accurate and timely crop recommendations
- Easy-to-use and accessible platform
- Data visualization for better understanding
- Improved productivity and profitability
